PROFESSIONAL SUMMARY

Computer Science and Engineering graduate (University of Chittagong) with research experience in multi-hop knowledge graph reasoning and hands-on work annotating and structuring data for a multi-institution AI research project. Comfortable across the data-to-decision pipeline: cleaning and modeling data, evaluating results, and communicating findings clearly, backed by full-stack development skills. Seeking Data Analyst, Business Analyst, or AI/ML Engineering roles.

EDUCATION

B.Sc. in Computer Science and Engineering Feb 2022 – Oct 2026
University of Chittagong Chattogram, Bangladesh

- CGPA: 3.61 / 4.00
- Thesis: *AdaPruner-KGQA: An Adaptive Search Space Pruning Framework for Efficient Multi-Hop Knowledge Graph Question Answering* —

Higher Secondary Certificate (HSC) 2020
Chandpur Government College Chandpur, Bangladesh

- GPA: 5.00 / 5.00

Secondary School Certificate (SSC) 2018
Hasan Ali Government High School Chandpur, Bangladesh

- GPA: 5.00 / 5.00

WORK EXPERIENCE

Data Annotator (Part-Time) Apr 2026 – Sep 2026
BDAI-HEAT Sub-project (HEAT-13211-CU) Chattogram, Bangladesh

- Served as a Scrum Level 2 mentor, guiding a team of Scrum Level 3 students in collecting raw data for the project's socio-economic sector, one of its core focus areas.
- Directed the team in designing the sector's ER diagram and building its ETL pipeline to structure, clean, and validate the collected data.
- Managed and quality-checked a 130-file dataset (223K+ rows, 3.64M values), including annotation oversight and consistency checks under research guidelines.

TECHNICAL SKILLS

- **Languages:** C, C++, Python, R, Java, JavaScript, PHP
- **AI / ML:** PyTorch, TensorFlow
- **Web and Mobile:** Next.js, Flutter, HTML, CSS
- **Databases:** MySQL, PostgreSQL
- **Tools:** Git and GitHub, L^AT_EX, PowerBI

COMPLETED PROJECTS

AdaPruner-KGQA – Adaptive Search-Space Pruning for Multi-Hop KGQA (Undergraduate Thesis) 2026
Python, PyTorch GitHub

- Developed AdaPruner-KGQA, an adaptive frontier-pruning framework for multi-hop KGQA that uses lightweight uncertainty-aware branch scoring over semantic, path-context, structural, and progress features to reduce unnecessary graph exploration while preserving the RoG (Reasoning on Graphs) relation-constrained reasoning pipeline; evaluated on two benchmark datasets: WebQuestionSP (WebQSP) and Complex Web Questions (CWQ).
- Reduced examined graph edges by **2.24% on WebQSP** and **5.05% on CWQ** while retaining **99.20%** and **98.72%** of RoG-reachable answers; downstream performance remained close to RoG at **85.7/69.9 Hits@1/F1** on WebQSP and **60.4/53.2** on CWQ.

Dynamic Memory Management and Leak Detection Toolkit 2024
C, x86 Assembly GitHub

- Built a low-level systems toolkit for an Operating Systems course: a custom dynamic memory allocator, a memory leak detector, and a paging / virtual-memory simulator, implemented in C with assembly routines.

BuildMaster – Role-Based Workforce Management System 2024
PHP, MySQL GitHub

- Developed a full-stack PHP/MySQL web application with separate authenticated dashboards for Admin, HR,

HR Members, Employees, Team/Volunteers, and Shareholders, covering registration, login, and role-specific views.

LEADERSHIP AND ACTIVITIES

Assistant Website Management Secretary (previously General Member) Feb 2024 – Apr 2026
Chittagong University Scientific Society *Chattogram, Bangladesh*

- Certified Organizer, IT Fiesta 2024: managed the technical setup for the programming contest at an event with 500 school, college, and university participants – 3 labs, 50 teams of 3, resolving technical issues during the contest.
- Volunteered at Chittagong University Science Carnival 4.0, an event with approximately 1,000 participants.
- Named Best Performer for the 2025/2026 committee session; separately recognized for outstanding performance and dedication as Assistant Website Management Secretary (2025).

CERTIFICATIONS AND TRAINING

Data Science and Machine Learning with Python and R | Data Solution 360 *Mar 2026*

- 6-month program (Batch 2504); covered statistical analysis, exploratory data analysis (EDA), and machine learning using Python and R

Python Basics | University of Michigan (Coursera) *Sep 2025*

- Instructors: Paul Resnick, Stephen Oney, and Jaclyn Cohen, University of Michigan

Mobile App Development (Android / Flutter / iOS) | Dept. of CSE, University of Chittagong – EDGE Project, Bangladesh Computer Council *Apr 2025*

- 80-hour training program, Dec 2024 – Apr 2025, under the ICT Division's EDGE Project

Data Science Math Skills | Duke University (Coursera) *Mar 2025*

- Instructors: Daniel Egger and Paul Bendich, Duke University
