Professional Summary

Computer Science and Engineering graduate from the University of Chittagong with experience in research on multi-hop knowledge graph reasoning and hands-on data annotation experience on a World Bank-funded research project (BDAI-HEAT), where I guided the socio-economics sector's raw data collection and ETL pipeline, which was a key project objective. Comfortable across the data-to-decision pipeline: cleaning and modeling data, evaluating results, and communicating findings clearly, backed by full-stack development skills. Now, I am seeking opportunities to apply my analytical, technical, and coordination skills in a corporate/factory setting.

Education

B.Sc. in Computer Science and Engineering Feb 2022 – Oct 2026
University of Chittagong *Chattogram, Bangladesh*

- CGPA: 3.61 / 4.00
- Thesis: *AdaPruner-KGQA: An Adaptive Search Space Pruning Framework for Efficient Multi-Hop Knowledge Graph Question Answering*

Higher Secondary Certificate (HSC) 2020
Chandpur Government College *Chandpur, Bangladesh*

- GPA: 5.00 / 5.00 – Board Merit Scholarship Awardee

Secondary School Certificate (SSC) 2018
Hasan Ali Government High School *Chandpur, Bangladesh*

- GPA: 5.00 / 5.00 – Board Merit Scholarship Awardee

Work Experience

Data Annotator Apr 2026 – Sep 2026
BDAI-HEAT Sub-project (HEAT-13211-CU, World Bank-funded) *Chattogram, Bangladesh*

- Mentored a team of Scrum Level 3 students in collecting raw socio-economic data for a research project, overseeing annotation quality and running consistency checks under research guidelines.
- Helped design the sector's ER diagram and used Python (pandas) and Google Sheets to organize, count, and clean dataset files into structured tables, producing a 130-file dataset with over 223K rows and 3.64M values.

Skills

- **Languages:** C, C++, Python, R, Java, JavaScript, TypeScript, PHP
- **AI / ML:** Scikit-learn, PyTorch, TensorFlow
- **Web and Mobile:** Next.js, Flutter, HTML, CSS
- **Databases:** MySQL, PostgreSQL
- **Tools:** Git and GitHub, LaTeX, Power BI

Completed Projects and Thesis

BuildMaster
PHP, MySQL *Code*

- Developed a full-stack PHP/MySQL web application with separate authenticated dashboards for Admin, HR, HR Members, Employees, Team/Volunteers, and Shareholders, covering registration, login, and role-specific views.

AdaPruner-KGQA (Undergraduate Thesis)
Python, PyTorch *Code*

- Developed AdaPruner-KGQA, an adaptive frontier-pruning framework for multi-hop KGQA that uses lightweight uncertainty-aware branch scoring over semantic, path-context, structural, and progress features to reduce unnecessary graph exploration while preserving the RoG (Reasoning on Graphs) relation-constrained reasoning pipeline; evaluated on two benchmark datasets: WebQuestionsSP (WebQSP) and ComplexWebQuestions (CWQ), which had over 31K training questions in total.
- Reduced examined graph edges by 2.24% on WebQSP and 5.05% on CWQ while retaining 99.20% and 98.72% of RoG-reachable answers; downstream performance remained close to RoG at 85.7/69.9 Hits@1/F1 on WebQSP and 60.4/53.2 on CWQ.

Leadership and Voluntary Activities

Assistant Website Management Secretary Jun 2025 – Apr 2026
Chittagong University Scientific Society *Chattogram, Bangladesh*

- Rebuilt and relaunched the club's website from a previously non-functional state into a fully operational platform, restoring the society's primary digital presence.
- Named Best Performer for the 2025/2026 committee session; separately recognized for outstanding performance and dedication as Assistant Website Management Secretary (2025).

General Member Feb 2024 – Jun 2025
Chittagong University Scientific Society *Chattogram, Bangladesh*

- Certified Organizer, IT Fiesta 2024: managed the technical setup for the programming contest at an event with 500 school, college, and university participants – 3 labs, 50 teams of 3, resolving technical issues during the contest.
- Volunteered at Chittagong University Science Carnival 4.0 (held in February 2025), an event with approximately 1,000 participants; recognized as one of the event's best volunteers.

Certifications and Training

Data Science and Machine Learning with Python and R | Data Solution 360 *Mar 2026*

- 6-month program (Batch 2504); covered statistical analysis, exploratory data analysis (EDA), and machine learning using Python and R

Python Basics | University of Michigan (Coursera) *Sep 2025*

- Instructors: Paul Resnick, Stephen Oney, and Jaclyn Cohen, University of Michigan

Data Science Math Skills | Duke University (Coursera) *Mar 2025*

- Instructors: Daniel Egger and Paul Bendich, Duke University
